

#### Section 1 product and company identification

**Product name:** Valve-regulated lead-acid battery:

BAT-12V7AH, BAT-12V17AH, BAT-12V4.5AH, BAT-12V12AH, BAT-12V5AH, BAT-12V9AH

Trademark: Gembird ®

Pure chemical

Company name: Gembird Electronics Ltd.

Mixture

Address: 2F, B Bulding, Shifeng Science and technology Park, Huaning Road,

Xinwei Village Dalang Street, Longhua, Bao An, Shenzhen, China

## Section 2 composition/information on ingredients

Chemical ingredients			
Chemical ingredient	Molecular formula	Content (about)	CAS No.
Lead and lead oxide	Pb, PbO <sub>2</sub>	60-70	7439-92-1,1309-60-0
Calcium	Са	<0.15	7440-70-2
Tin	Sn	<1	7440-31-5
Sulfuric acid	$H_2SO_4$	10-15	7664-93-9
ABS		5-10	9003-56-9
AGM separator		3-4	

## Section 3 hazards summarizing

#### Classification of Danger (see section 14)

Invasion Route: eyes, skin contact, ingestion

**Health Hazard:** The Valve-regulated lead-acid batteries are not hazardous when used according to the instructions of manufacturer under normal conditions. In case of abuse, there's risk of rupture, fire, heat, leakage of internal components, with could cause casualty loss. Contact with internal components may cause irritation or burns to eyes and skin. Abuses include but not limited to the following cases: charged for long time, short circuited, put into fire, whacked with hard object, punctured with acute object, crushed, and broken.

**Environmental Hazard** The internal electrolytemay cause adverse environmentalimpacts

The Danger of Burning and Exploding May occur fire or explosion in high temperature or short circuit.

### Section 4 first-aid measures

The valve-regulated lead-acid batteries are not hazardous with eye and skincontact under normal circumstance. In case of internal hazardous substanceleaking, following measures should be taken if body parts contact with these substance:

#### AFTER SKIN CONTACT:

In case of contact, immediately wash skin with soap and copious amounts of water.

**AFTER EYE CONTACT:** In case of contact, flush eyes with clean water for 15 minutes while lifting eyelids.Get prompt medical attention.

**AFTER INHALATION:** If inhaled, remove to fresh air. If not breathing give artificial respiration. If breathing is difficult, give oxygen.

#### **AFTER INGESTION:**

If swallowed, wash out mouth with water provided person is conscious. Call a physician.

### Section 5 fire-fighting measures

Characteristics of Hazard Toxic fumes; gases or vapors may evolve on burning.

Hazardous Combustion Products CO, CO2, acid, hydrogen and oxygen gas

Fire-extinguishing Methods and Extinguishing Media Carbon dioxide, dry chemical powder, or appropriate foam

Attention in Fire-extinguishing The Firemen should put on antigas masks and full fire-fighting suits.

#### Section 6 accidental release measures

When leakage of batteries happens, liquid could be absorbed with sands, earth, or other inert substance, and the contaminated area should be ventilated meantime. Damaged batteries that are not hot or burning should be placed in a sealed plastic bag or container.

### Section 7 handling and storage

**Handling:** don't handling the batteries in manner that allows terminals to short circuit **Storage:** Store and used far away from heat, sparks, open flame, or other heat ignition sources, and under room temperature(<30°C) in ventilating and dehumidifying environments

### Section 8 exposure controls/personal protection

Maximum Allowable Concentration: No Standard available

**Engineering Controls:** no engineering controls are required for handling batteries that have not been damaged. Personal protective equipments for damaged batteries should include chemical resistant gloves and safety glasses.

Version: 2.2 update: 2013/01

Page 2 of 4

# **Section 9 Physical and Chemical Properties**

Not applicable

# Section 10 stability and reactivity

Stability Stable under normal temperatures and pressures: environment temperature +20...+35 °C; relative humidity 45...80 %; atmospheric pressure 84...107 kPa (630...800 mm Hg)
Incompatibility oxidizing agents
Conditions to Avoid Heat and open flame, short circuit, and water
Hazardous polymerization Will not occur
Decomposition Products CO, CO2 , acid, hydrogen and oxygen gas

## Section 11 toxicological information

This product does not elicit toxicological properties during routine handling and use.

## Section 12 ecological information

Ecological toxicityN/A

**Biodegradability N/A** 

Non-biodegradabilityN/A

Other hazardousThe internal electrolyte may cause adverse environmental impacts

# Section 13 disposal

Waste Treatment Recycle or dispose of in accordance with government, state & local regulations.

Attention for Waste Treatment: Deserted batteries couldn't be treated as ordinary trash. Couldn't be thrown into fire or placed in high temperature. Couldn't be dissected, pierced, crushed or treated similarly. Best way is recycling.

# Section 14 transport information

UN NO. N/A Proper shipping name: N/A Packing group: N/A

ICAO/IATA	IMDG CODE	DOT
Not- regulated	Not- regulated	Not- regulated
Can be shipped by air in	International Maritime	Non-Spillable Battery complies with
accordance with International Air	Organization(IMO) under Special	the provisions listed in 49 CFR
Transport Association(IATA),DGR	Provision 238	173.159(d), therefore must not be
Packing Instructions(PI), PI872		marked with an identification
appropriate and Special Provision		number or hazardous label and is
A67		not subject to hazardous shipping
		paper requirements.

Batteries must be securely packed to short-circuiting

## Section 15 regulatory information

**Regulatory information :** Recommendations on the transport of dangerous goods-model regulations(15th revised), IATA dangerous goods regulations, International Maritime Dangerous Goods Code, U.S. Hazardous Material Regulations

## Section16 other information

**Reference:** National standard of People's Republic of China (GB16483-2008) Safety data for chemical products— Content and order of sections
